

We stand by f.Lotta!

f.Lotta is organizing a massive maritime occupation in the central Mediterranean sea and in different parts of Europe, to protest against the deadly effects of the racist border policies of the European Union. f.Lotta takes a stance for freedom of movement, and asks all of us to do the same.

f.Lotta sheds light to the worsening reality of the central Med. Here, the state has expanded its tight control, constraining solidarity efforts by civil society, obstructing and criminalizing sea rescue, financing Libyan militias which in turn are called coastguard. Here, thousands of lives are claimed each year by the border regime.

We share f.Lotta demands for a radically different present. We should not live in a world where goods and weapons cross seas and borders, while those same borders are barriers against people and turn into graveyards.

Struggles are interconnected and intersectional: none can be free until we all are. With this message we publicly support f.Lotta, for freedom of movement.
